

Weekly Progress Report

Amity School of Engineering & Technology
B. Tech: Program

WPR No: 3	Duration: 3 August 2026 – 9 August 2026
------------------	--

Weekly Progress Report (WPR) for Minor Project

To be filled by Students	
Students Name	Rohit Yadav, Vishal, Hardik Mehlawat (Group 148)
Roll no.	472 (Rohit), 568 (Vishal), 449 (Hardik)
Enrollment no.	A2305223472 (Rohit), A2305223568 (Vishal), A2305223449 (Hardik)
Project Title finalized, if Yes, give name, if NO, give reason	Yes — Deep Learning for AI-Generated Image Detection: A Review of CNN, Vision Transformer, and Explainable Approaches
Synopsis submitted	Submitted (on Amizone, with offer letter)
Literature review	All 48 primary studies read in full; eight-column extraction table populated; citation-identifier checks completed
Technical & Economical Feasibility	Not started
Bill of Material	N/A (literature review project this semester)
Project Progress Schedule (PERT Chart)	Week-wise schedule prepared; PERT chart pending
Design of critical components	Paper structure fixed (8 sections); extraction schema finalised to feed the Section 6 comparison table
Fabrication work (give %)	N/A
Experimental work (give %)	Not started (planned for Semester 8)
Result and Analysis	Not started
Report writing	Not started (drafting begins next week with Section 1)
Signature of students	
Work done in this week	
The full texts of the 48 primary studies shortlisted in Week 2 were read and logged into the structured extraction table, one row per study, covering detection approach, model/architecture, dataset used, generators covered, reported accuracy/AUC, cross-generator testing, and key limitation. Ten cells where the paper text did not state a value were marked for the later verification pass instead of being filled by guesswork. Citation-identifier checks were also completed: DOIs for three flagged papers were confirmed against IEEE Xplore, an IEEE DOI was located for one workshop paper previously recorded as CVF-only, one preprint was found to have been published in IEEE Transactions on Artificial Intelligence and will be cited in its journal form, and one low-cited preprint was excluded under the inclusion criteria. The screened set now stands at 48 primary studies, 11 secondary studies, and 15 background references. The extraction table is the direct input for the master comparison table planned in Week 9.	
To be filled by Guide (strike off whichever is not applicable)	
Performance of students is satisfactory ☐	
Performance of students is unsatisfactory ☐	
A warning to be issued to student(s) (Name) _____	
Student was not well (Name) _____
