

Weekly Progress Report
Amity School of Engineering & Technology
B. Tech: Program

WPR No: 10	Duration: 21 September 2026 – 27 September 2026
-------------------	--

Weekly Progress Report (WPR) for Minor Project

To be filled by Students	
Students Name	Rohit Yadav, Vishal, Hardik Mehlawat (Group 148)
Roll no.	472 (Rohit), 568 (Vishal), 449 (Hardik)
Enrollment no.	A2305223472 (Rohit), A2305223568 (Vishal), A2305223449 (Hardik)
Project Title finalized, if Yes, give name, if NO, give reason	Yes — Deep Learning for AI-Generated Image Detection: A Review of CNN, Vision Transformer, and Explainable Approaches
Synopsis submitted	Submitted (on Amizone, with offer letter)
Literature review	Complete — master comparison table now covers all 48 primary studies in one row each across the eight fixed columns, machine-checked against the extraction table (48/48 rows matched)
Technical & Economical Feasibility	Not started
Bill of Material	N/A (literature review project this semester)
Project Progress Schedule (PERT Chart)	Week-wise schedule prepared; PERT chart pending
Design of critical components	Paper structure fixed (8 sections); Section 3 taxonomy finalised across subsections 3.1–3.5; dataset comparison table, master literature comparison table and the metrics/search-flow figures fixed
Fabrication work (give %)	N/A
Experimental work (give %)	Not started (planned for Semester 8)
Result and Analysis	Not started
Report writing	All sections drafted — Sections 1–8 plus abstract (about 9,850 words); assembly into the report format and the final reference verification pass next
Signature of students	
Work done in this week	
Section 7 (challenges and gap analysis), Section 8 (conclusion) and the abstract were drafted this week, which completes the body of the paper. Section 7 runs to 1,039 words and cites 22 references, and is organised as five named sub-problems: cross-generator generalisation, robustness to compression and post-processing, dataset bias and staleness, interpretability, and reproducibility and comparability. Each sub-problem is anchored in the evidence already surveyed in Sections 3 to 6 rather than stated as a general complaint, so every claim in it traces back to a study in the extraction records. The section then gives the gap statement and sets out the study planned for the second phase: a matched transfer-learning comparison of ResNet50, DenseNet121, EfficientNet-B0 and VGG19 against a Vision Transformer benchmark on CIFAKE, with Grad-CAM analysis and a cross-generator test on a GenImage subset. Every element of that plan is justified from a finding in the review, and the whole of it is stated explicitly as future work with no results, since no experiments are run this semester. Section 8 (conclusion) runs to 310 words and closes the argument without introducing new material. The abstract was written at 246 words with six keywords, and cites no references, following the standard practice for review papers. The paper body is now fully drafted at roughly 9,850 words across Sections 1 to 8 plus the abstract, supported by two comparison tables and two figures, with every number traceable to the extraction records. Assembly of the full draft into the report document and the final reference verification pass are scheduled next.	
To be filled by Guide (strike off whichever is not applicable)	
Performance of students is satisfactory []	
Performance of students is unsatisfactory []	
A warning to be issued to student(s) (Name) _____	
Student was not well (Name) _____
